

## COURSE OUTLINE

### 1. Data about the study programme

|                                    |                                     |
|------------------------------------|-------------------------------------|
| 1.1 Higher education institution   | Transilvania University of Braşov   |
| 1.2 Faculty                        | Silviculture and Forest Engineering |
| 1.3 Department                     | Interdisciplinary Doctoral School   |
| 1.4 Field of study <sup>1)</sup>   | PhD                                 |
| 1.5 Study level <sup>2)</sup>      | PhD                                 |
| 1.6 Study programme/ Qualification | Engineering Sciences                |

### 2. Data about the course

|   |                                   |              |   |                     |   |                   |                               |     |
|---|-----------------------------------|--------------|---|---------------------|---|-------------------|-------------------------------|-----|
| 2.1 Name of course                        | Dissemination of Research Results |              |   |                     |   |                   |                               |     |
| 2.2 Course convenor                       | Prof. Dr. Alexandru Lucian Curtu  |              |   |                     |   |                   |                               |     |
| 2.3 Seminar/ laboratory/ project convenor | Prof. Dr. Alexandru Lucian Curtu  |              |   |                     |   |                   |                               |     |
| 2.4 Study year                            | I                                 | 2.5 Semester | I | 2.6 Evaluation type | E | 2.7 Course status | Content <sup>3)</sup>         | SC  |
|   |                                   |              |   |                     |   |                   | Attendance type <sup>4)</sup> | CPC |

### 3. Total estimated time (hours of teaching activities per semester)

|   |    |                           |   |                                  |       |
|---|----|---------------------------|---|----------------------------------|-------|
| 3.1 Number of hours per week  | 2  | out of which: 3.2 lecture | 1 | 3.3 seminar/ laboratory/ project | 1     |
| 3.4 Total number of hours in the curriculum   | 12 | out of which: 3.5 lecture | 6 | 3.6 seminar/ laboratory/ project | 6     |
| Time allocation   |    |                           |   |                                  | hours |
| Study of textbooks, course support, bibliography and notes                                  |    |                           |   |                                  | 40    |
| Additional documentation in libraries, specialized electronic platforms, and field research |    |                           |   |                                  | 56    |
| Preparation of seminars/ laboratories/ projects, homework, papers, portfolios, and essays   |    |                           |   |                                  | 34    |
| Tutorial  |    |                           |   |                                  | 4     |
| Examinations  |    |                           |   |                                  | 2     |
| Other activities  |    |                           |   |                                  | 2     |
| 3.7 Total number of individual study hours  |    | 138                       |   |                                  |       |
| 3.8 Total number per semester   |    | 150                       |   |                                  |       |
| 3.9 Number of credits <sup>5)</sup>   |    | 5                         |   |                                  |       |

### 4. Prerequisites (if applicable)

|                         |   |
|-------------------------|---|
| 4.1 curriculum-related  | • |
| 4.2 competences-related | • |

### 5. Conditions (if applicable)

|  |                         |
|--|-------------------------|
| 5.1 for course development                       | • Standard lecture room |
| 5.2 for seminar/ laboratory/ project development | • Standard seminar room |

### 6. Specific competences

|                          |  |
|--------------------------|--|
| Professional competences | <ul style="list-style-type: none"> <li>Understand how to structure information and how to write scientific articles</li> <li>Apply principles of effective public communication in presenting research results</li> </ul>                |
| Transversal competences  | <ul style="list-style-type: none"> <li>Develop and employ critical thinking skills in analysing and evaluating scientific information</li> <li>Manage time resources efficiently to meet academic and professional objectives</li> </ul> |

## 7. Course objectives (resulting from the specific competences to be acquired)

|                              |   |
|------------------------------|---|
| 7.1 General course objective | <ul style="list-style-type: none"> <li>To develop their skills in disseminating the results of their doctoral research in written texts (scientific articles) and via oral presentations</li> </ul> |
| 7.2 Specific objectives      | <ul style="list-style-type: none"> <li>To develop their skills in article writing</li> <li>To develop their skills in presenting their research results</li> </ul>                                  |

## 8. Content

| 8.1 Lecture  | Teaching methods          | No. of hours | Remarks |
|--|---------------------------|--------------|---------|
| Guidelines for writing research articles.<br>Article sections: overview, content, order of creation  | interactive               | 4            |         |
| Aspects of oral communication in research: conference presentations (from planning to delivery)  | interactive               | 2            |         |
| Bibliography<br>Bates College (2004-2017) Department of Biology, How to Write a Paper in Scientific Journal Style and Format, <a href="http://abacus.bates.edu/~qanderso/biology/resources/writing/HTWtoc.html">http://abacus.bates.edu/~qanderso/biology/resources/writing/HTWtoc.html</a> .<br>Curtu AL (2025) Lecture notes (available on the e-learning platform).<br>Elzinga C <i>Guidelines for Writing Scientific Papers</i> , 185-192, <a href="https://msu.edu/course/lbs/158h/manual/paper.pdf">https://msu.edu/course/lbs/158h/manual/paper.pdf</a> .<br>Harley CD, Hixon MA, Levin LA (2004) Scientific writing and publishing - a guide for students. <i>Bulletin of the Ecological Society of America</i> <b>78</b> .<br>Norris, C.B. 2022, Academic Writing in English, University of Helsinki                  |                           |              |         |
| 8.2 Seminar/ laboratory/ project   | Teaching-learning methods | No. of hours | Remarks |
| Presentation on Background to the study, Research objectives and Plan for dissemination  | discussion                | 6            |         |
| Bibliography<br>Bates College (2004-2017) Department of Biology, How to Write a Paper in Scientific Journal Style and Format, <a href="http://abacus.bates.edu/~qanderso/biology/resources/writing/HTWtoc.html">http://abacus.bates.edu/~qanderso/biology/resources/writing/HTWtoc.html</a> .<br>Curtu AL (2025) Instructions for the assignment (available on the e-learning platform)<br>Elzinga C <i>Guidelines for Writing Scientific Papers</i> , 185-192, <a href="https://msu.edu/course/lbs/158h/manual/paper.pdf">https://msu.edu/course/lbs/158h/manual/paper.pdf</a> .<br>Harley CD, Hixon MA, Levin LA (2004) Scientific writing and publishing - a guide for students. <i>Bulletin of the Ecological Society of America</i> <b>78</b> .<br>Norris, C.B. 2022, Academic Writing in English, University of Helsinki |                           |              |         |

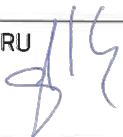

9. Correlation of course content with the demands of the labour market (epistemic communities, professional associations, potential employers)

|  |
|--|
|  |
|--|

10. Evaluation

| Activity type   | 10.1 Evaluation criteria              | 10.2 Evaluation methods                               | 10.3 Percentage of the final grade |
|---|---------------------------------------|---|------------------------------------|
| 10.4 Lecture  | Video file on the e-learning platform | Incorporation of the feedback received during seminar | 50%                                |
|   |                                       |   |                                    |
| 10.5 Seminar/ laboratory/ project   | Presentation during seminar           | Structure, content and delivery of the presentation   | 50%                                |
|   |                                       |   |                                    |
| 10.6 Minimal performance standard   |                                       |   |                                    |
| <ul style="list-style-type: none"> <li>Presentation of the Background to the study, Research objectives and Plan for dissemination</li> </ul> |                                       |   |                                    |

This Course Outline was approved by the Council of the Interdisciplinary Doctoral School (SDI) on 18 November 2025 and approved by the Council for Doctoral Studies (CSUD) on 19 November 2025.

|  |   |

| <b>Prof. Dr. Eng. Cătălin ALEXANDRU</b><br>Director of CSUD<br> | Prof. dr. Mona Brigitte ARHIRE<br>Director of SDI<br>                                  |
| Prof. Dr. Alexandru Lucian CURTU<br>Lecture convenor<br>        | Prof. Dr. Prof. Dr. Alexandru Lucian CURTU<br>Seminar/ laboratory/ project convenor<br> |

Note:

- 1) Field of study – select one of the following options: BA/MA/PhD. (to be filled in according to the forceful classification list for study programmes);
- 2) Study level – choose from among: BA/MA/PhD.;
- 3) Course status (content) – for the BA level, select one of the following options: FC (fundamental course) / DC (course in the study domain)/ SC (speciality course)/ CC (complementary course); for the MA level, select one of the following options: PC (proficiency course)/ SC (synthesis course)/ AC (advanced course)
- 4) Course status (attendance type) – select one of the following options: CPC (compulsory course)/ EC (elective course)/ NCPC (non-compulsory course);
- 5) One credit is the equivalent of 25 – 30 study hours (teaching activities and individual study).

## COURSE OUTLINE

### 1. Data about the study programme

|                                    |                                   |
|------------------------------------|-----------------------------------|
| 1.1 Higher education institution   | Transilvania University of Braşov |
| 1.2 Faculty                        |                                   |
| 1.3 Department                     | Interdisciplinary Doctoral School |
| 1.4 Field of study <sup>1)</sup>   |                                   |
| 1.5 Study level <sup>2)</sup>      | PhD                               |
| 1.6 Study programme/ Qualification |                                   |

### 2. Data about the course

|   |   |              |   |                     |    |                   |                               |    |
|---|---|--------------|---|---------------------|----|-------------------|-------------------------------|----|
| 2.1 Name of course                        | Acquisition and Processing of Experimental Data |              |   |                     |    |                   |                               |    |
| 2.2 Course convenor                       | Assoc. Prof. Dr. Marius VOLMER                  |              |   |                     |    |                   |                               |    |
| 2.3 Seminar/ laboratory/ project convenor | Assoc. Prof. Dr. Marius VOLMER                  |              |   |                     |    |                   |                               |    |
| 2.4 Study year                            | I   | 2.5 Semester | I | 2.6 Evaluation type | E1 | 2.7 Course status | Content <sup>3)</sup>         | DC |
|   |   |              |   |                     |    |                   | Attendance type <sup>4)</sup> | EC |

### 3. Total estimated time (hours of teaching activities per semester)

|   |    |                           |   |                                  |       |
|---|----|---------------------------|---|----------------------------------|-------|
| 3.1 Number of hours per week  | 2  | out of which: 3.2 lecture | 1 | 3.3 seminar/ laboratory/ project | 1     |
| 3.4 Total number of hours in the curriculum   | 12 | out of which: 3.5 lecture | 6 | 3.6 seminar/ laboratory/ project | 6     |
| Time allocation   |    |                           |   |                                  | hours |
| Study of textbooks, course support, bibliography and notes                                  |    |                           |   |                                  | 40    |
| Additional documentation in libraries, specialized electronic platforms, and field research |    |                           |   |                                  | 45    |
| Preparation of seminars/ laboratories/ projects, homework, papers, portfolios, and essays   |    |                           |   |                                  | 28    |
| Tutorial  |    |                           |   |                                  | 2     |
| Examinations  |    |                           |   |                                  | 4     |
| Other activities  |    |                           |   |                                  |       |
| 3.7 Total number of individual study hours  |    | 119                       |   |                                  |       |
| 3.8 Total number per semester   |    | 125                       |   |                                  |       |
| 3.9 Number of credits <sup>5)</sup>   |    | 5                         |   |                                  |       |

### 4. Prerequisites (if applicable)

|                         |     |
|-------------------------|-----|
| 4.1 curriculum-related  | • - |
| 4.2 competences-related | • - |

### 5. Conditions (if applicable)

|  |  |
|--|--|
| 5.1 for course development                       | • Classroom with video projector and internet connection |
| 5.2 for seminar/ laboratory/ project development | • Classroom with video projector and internet connection |

### 6. Specific competences

|                          |   |
|--------------------------|---|
| Professional competences | <ul style="list-style-type: none"> <li>Appropriate application of acquired knowledge for the design and implementation of scientific experiments necessary for doctoral training.</li> <li>Applying the knowledge acquired in the process of writing scientific reports/articles</li> </ul> |
| Transversal competences  | <ul style="list-style-type: none"> <li>Performing complex professional tasks under conditions of autonomy and professional independence</li> <li>Learning teamwork and cooperation within epistemic networks</li> </ul>   |

## 7. Course objectives (resulting from the specific competences to be acquired)

|                              |  |
|------------------------------|--|
| 7.1 General course objective | <ul style="list-style-type: none"> <li>To familiarize the PhD student with modern data acquisition systems and processing methods.</li> </ul>  |
| 7.2 Specific objectives      | <ul style="list-style-type: none"> <li>Understanding the structure of a measurement chain adapted to research activity</li> <li>Ensuring the ability to process and correctly interpret numerical data obtained from experiments within doctoral research</li> </ul> |

## 8. Content

| 8.1 Lecture  | Teaching methods  | No. of hours | Remarks  |
|--|---|--------------|--|
| Acquisition and Processing of Experimental Data – Introductory aspects and motivation.<br>Scientific method - body of techniques for investigating phenomena, acquiring new knowledge, and others. Examples.<br>Experiment and measurement - selection of proper methods, instrumentation and consideration of experimental uncertainties. Examples of data acquisition for different types of physical quantities.  | Interactive teaching materials, presented with video projector. | 3            | Teaching centered on PhD students with examples and practical applications |
| Experimental data processing. Experimental Errors and Uncertainties; Graphical representation of experimental data; Practical examples.<br>Noise reduction methods. Hardware noise reduction, data averaging and digital signal processing (DSP). Fast Fourier Transform utilized for signal processing and noise reduction. Examples.   | Interactive teaching materials, presented with video projector. | 3            | Teaching centered on PhD students with examples and practical applications |

**9. Correlation of course content with the demands of the labour market (epistemic communities, professional associations, potential employers)**

The course provides the knowledge necessary to implement modern methods of investigation, acquisition and analysis of data in research activity.

**10. Evaluation**

| Activity type  | 10.1 Evaluation criteria  | 10.2 Evaluation methods                | 10.3 Percentage of the final grade |
|--|---|--|------------------------------------|
| 10.4 Lecture   | Active involvement of the doctoral student through discussions based on the topics presented. | Ongoing evaluation                     | 15 %                               |
| 10.5 Seminar/ laboratory/ project  | Active involvement of the PhD student during seminar classes.                                 | Ongoing evaluation.                    | 15 %                               |
|  | Developing a project based on the topic addressed.  | Examination based on presented project | 70 %                               |
| 10.6 Minimal performance standard  |   |  |                                    |
| <ul style="list-style-type: none"> <li>Mastery of the basic elementary notions of the discipline demonstrated through the projects presented.</li> </ul> |   |  |                                    |

This Course Outline was approved by the Council of the Interdisciplinary Doctoral School (SDI) on 18 November 2025 and approved by the Council for Doctoral Studies (CSUD) on 19 November 2025.

Assoc. Prof. Dr. Marius VOLMER  
Lecture convenor 

Assoc. Prof. Dr. Marius VOLMER  
Seminar/ laboratory/ project convenor 

Note:

- 1) Field of study – select one of the following options: BA/MA/PhD. (to be filled in according to the forceful classification list for study programmes);
- 2) Study level – choose from among: BA/MA/PhD.;
- 3) Course status (content) – for the BA level, select one of the following options: FC (fundamental course) / DC (course in the study domain)/ SC (speciality course)/ CC (complementary course); for the MA level, select one of the following options: PC (proficiency course)/ SC (synthesis course)/ AC (advanced course)
- 4) Course status (attendance type) – select one of the following options: CPC (compulsory course)/ EC (elective course)/ NCPC (non-compulsory course);
- 5) One credit is the equivalent of 25 – 30 study hours (teaching activities and individual study).

## FIȘA DISCIPLINEI

### 1. Date despre program

|  |  |
|--|--|
| 1.1 Instituția de învățământ superior            | Universitatea Transilvania din Brașov  |
| 1.2 Facultatea                                   |  |
| 1.3 Departamentul                                | Școala Doctorală Interdisciplinară   |
| 1.4 Domeniul de studii de doctorat <sup>1)</sup> | Științe inginerești  |
| 1.5 Ciclul de studii <sup>2)</sup>               | DOCTORAT   |
| 1.6 Programul de studii/Calificarea              | Inginerie mecanică, Inginerie industrială, Inginerie electrică, Calculatoare și tehnologia informației, Inginerie electronică, telecomunicații și tehnologii informaționale, Ingineria materialelor, Ingineria sistemelor, Inginerie și management, Silvicultură, Inginerie forestieră |

### 2. Date despre disciplină

|  |                               |               |   |                       |   |                         |                              |     |
|--|-------------------------------|---------------|---|-----------------------|---|-------------------------|------------------------------|-----|
| 2.1 Denumirea disciplinei                                  | Creativitate și Inventică     |               |   |                       |   |                         |                              |     |
| 2.2 Titularul activităților de curs                        | Prof. dr. ing. Șerban BOBANCU |               |   |                       |   |                         |                              |     |
| 2.3 Titularul activităților de seminar/ laborator/ proiect | Prof. dr. ing. Șerban BOBANCU |               |   |                       |   |                         |                              |     |
| 2.4 Anul de studiu   | 1                             | 2.5 Semestrul | 1 | 2.6 Tipul de evaluare | E | 2.7 Regimul disciplinei | Conținut <sup>3)</sup>       | DCA |
|  |                               |               |   |                       |   |                         | Obligativitate <sup>3)</sup> | DO  |

### 3. Timpul total estimat (ore pe semestru al activităților didactice)

|  |     |                    |   |                                  |     |
|--|-----|--------------------|---|----------------------------------|-----|
| 3.1 Număr de ore pe săptămână (6 săptămâni)  | 2   | din care: 3.2 curs | 1 | 3.3 seminar/ laborator / proiect | 1   |
| 3.4 Total ore din planul de învățământ   | 12  | din care: 3.5 curs | 6 | 3.6 seminar/ laborator/ proiect  | 6   |
| Distribuția fondului de timp   |     |                    |   |                                  | ore |
| Studiul după manual, suport de curs, bibliografie și notițe                                    |     |                    |   |                                  | 38  |
| Documentare suplimentară în bibliotecă, pe platformele electronice de specialitate și pe teren |     |                    |   |                                  | 36  |
| Pregătire seminare/ laboratoare/ proiecte, teme, referate, portofolii și eseuri                |     |                    |   |                                  | 35  |
| Tutoriat   |     |                    |   |                                  | 2   |
| Examinări  |     |                    |   |                                  | 2   |
| Alte activități.....   |     |                    |   |                                  |     |
| 3.7 Total ore de activitate a studentului  | 113 |                    |   |                                  |     |
| 3.8 Total ore pe semestru  | 125 |                    |   |                                  |     |
| 3.9 Numărul de credite <sup>5)</sup>   | 5   |                    |   |                                  |     |

### 4. Precondiții (acolo unde este cazul)

|                   |                                      |
|-------------------|--------------------------------------|
| 4.1 de curriculum | • Cursant în cadrul Școlii Doctorale |
| 4.2 de competențe | •                                    |

### 5. Condiții (acolo unde este cazul)

|  |                                   |
|--|-----------------------------------|
| 5.1 de desfășurare a cursului                                | • Acces INTERNET + videoproiector |
| 5.2 de desfășurare a seminarului/ laboratorului/ proiectului | • Acces INTERNET + videoproiector |

## 6. Competențe specifice acumulate

|                         |   |
|-------------------------|---|
| Competențe profesionale | <ul style="list-style-type: none"> <li>• Creșterea propriei potențe creative</li> <li>• Înțelegerea procedurilor care duc la cel mai mare randament în activitatea de concepție</li> <li>• Însușirea unor tehnici specifice activităților creative</li> <li>• Aplicarea acelor tehnici care se potrivesc cel mai bine cursantului și domeniului de specializare prin doctorat</li> <li>• Însușirea deprinderilor specifice expunerii propriilor creații tehnice în fața unui auditoriu de specialitate</li> </ul> |
| Competențe transversale | <ul style="list-style-type: none"> <li>• Corelarea rigorilor propriului domeniu de specializare cu tehnici generale de creativitate</li> </ul>  |

## 7. Obiectivele disciplinei (reieșind din competențele specifice acumulate)

|                                       |   |
|---------------------------------------|---|
| 7.1 Obiectivul general al disciplinei | <ul style="list-style-type: none"> <li>• Dezvoltarea capacităților creative a propriei persoane. Efectuarea unor teste specifice. Dezvoltarea aptitudinilor și însușirea unor tehnici de creativitate în grup.</li> <li>• Înțelegerea și punerea în practică (prin intermediul unui referat) a metodologiilor de concepție inovativă, utilizând tehnici individuale și de grup.</li> <li>• Însușirea noțiunilor de proprietate intelectuală. Însușirea metodologiilor pentru brevetarea invențiilor în România și străinătate.</li> <li>• Propunerea de către fiecare cursant a unor inovații sau potențiale invenții.</li> </ul> |
| 7.2 Obiectivele specifice             | <ul style="list-style-type: none"> <li>• Publicarea unei lucrări cu conținut inovativ într-o revistă de specialitate</li> </ul>   |

## 8. Conținuturi

| 8.1 Curs  | Metode de predare                | Nr. ore | Obs. |
|---|----------------------------------|---------|------|
| 1. Dezvoltarea propriei potențe creative. Concepte psihanalitice privind activitatea mentală. Principiile lui FREUD și ADLER. Dezvoltările practice ale lui YOUNG. Somnul, activitatea mentală și actul creativ. Relația somn paradoxal REM-memorie. Modalități practice de direcționare a inconștientului în activitatea creatoare. Corelația activității onirice cu cea creativă. Metode de utilizare a inconștientului la rezolvarea novatoare a unei probleme. Antrenamentul creativității proprii. | Prelegere, conversatie euristica | 2       |      |
| 2. Tehnica BRAINSTORMING (cascada ideilor). Principiile metodei. Modalitatea practică a organizării și funcționării grupului creativ. Check-listă pentru ieșirea din impas. Tehnica analizei morfologice. Prospectarea câmpurilor de decizie independente - PINDAR. Tehnica DELPHY.   | Prelegere, conversatie euristica | 2       |      |
| 3. Obstacole în cale gândirii creatoare. Teste pentru educarea și dezvoltarea potenței creative a propriei persoane. Analiza multicriterială avansată   | Prelegere, conversatie euristica | 1       |      |
| 4. Noțiuni de proprietate intelectuală. Creații intelectuale industriale. Invenția. Inovația. Know-how. Desene și modele industriale etc. Semne distinctive. Mărcile de fabrică, de   | Prelegere, conversatie euristica | 1       |      |

|   |                            |              |            |
|---|----------------------------|--------------|------------|
| comerț și de serviciu. Alte semne distinctive. Dreptul de autor și drepturi conexe dreptului de autor. Brevetarea invențiilor.  |                            |              |            |
| Bibliografie<br>1. ADAMS, J.L. <i>Conceptual blockbusting. A guide to better Ideas</i> , 2001. Basic books. Perseus Publishing, Cambridge Center, New York.<br>2. BOBANCU, Ș., <i>Creativitate și Inventică</i> , Curs, Ediția a X-a, 2015, www.unitbv.ro.<br>3. BOBANCU, Ș., COZMA, R., LIXĂNDROIU, D., FOIȘOREANU, V., <i>Tehnici de creativitate</i> , Editura Lux Libris, Brașov, 1998. Cota Bibliotecii: CAT 084.<br>4. BOBANCU, Ș., COZMA, R., <i>Tehnici de Inovare-Inventică pentru utilizări practice</i> , Curs universitar, Universitatea din Brașov, 1997. Cota Bibliotecii: III 14364. |                            |              |            |
| 8.2 Seminar/ laborator/ proiect   | Metode de predare-învățare | Număr de ore | Observații |
| Sunt seminarizate cunoștințele de bază din capitolele cursului. Se urmărește însușirea și aplicarea efectivă a unor tehnici de creație individuale și de grup. Se face o cercetare bibliografică, respectiv un studiu de nivel pentru un referat specific. Tematica referatului va fi, dacă e posibil, din domeniul tezei de doctorat sau dacă nu, din alt domeniu de interes pentru cursant și conducătorul de doctorat (cu care, doctorandul trebuie să se consulte în prealabil).  | Discutii interactive       | 6            |            |
| Bibliografie. Aceeași cu cea de la curs.  |                            |              |            |

9. Coroborarea conținuturilor disciplinei cu așteptările reprezentanților comunităților epistemice, ale asociațiilor profesionale și ale angajatorilor reprezentativi din domeniul aferent programului

|   |  |
|---|--|
| Competențele specifice acumulate înlesnesc rezolvarea inovativă a unor teme/probleme ale mediului industrial. |  |
|---|--|

#### 10. Evaluare

| Tip de activitate                  | 10.1 Criterii de evaluare   | 10.2 Metode de evaluare                              | 10.3 Pondere din nota finală |
|------------------------------------|---|--|------------------------------|
| 10.4 Curs                          | Apresiasi gradului de însușire a tehnicilor de creativitate         | Examen scris   | 20%                          |
|                                    | Analiza opiniilor proprii ale cursantului                           |  |                              |
| 10.5 Seminar/ laborator/ proiect   | Respectarea cerințelor impuse și apresiasi gradului de creativitate | Referat întocmit în activitatea de studiu individual | 80%                          |
|                                    |   |  |                              |
| 10.6 Standard minim de performanță |   |  |                              |

Prezenta Fișă de disciplină a fost avizată în ședința de Consiliu L SDI din data de 18.11.2025 și aprobată de CSUD în data de 19.11.2025

Prof. dr. ing. Catalin ALEXANDRU  
Director CSUD

Prof. dr. Mona Brigitte ARHIRE  
Director SDI

Prof. dr. ing. Șerban BOBANCU  
Titular de curs

Prof. dr. ing. Șerban BOBANCU  
Titular de seminar/ laborator/ proiect

Notă:

- 1) Domeniul de studii - se alege una din variantele: Licență/ Masterat/ Doctorat (se completează conform cu Nomenclatorul domeniilor și al specializărilor/ programelor de studii universitare în vigoare);
- 2) Ciclul de studii - se alege una din variantele: Licență/ Masterat/ Doctorat;
- 3) Regimul disciplinei (conținut) - se alege una din variantele: DF (disciplină fundamentală)/ DD (disciplină din domeniu)/ DS (disciplină de specialitate)/ DC (disciplină complementară) - pentru nivelul de licență; DAP (disciplină de aprofundare)/ DSI (disciplină de sinteză)/ DCA (disciplină de cunoaștere avansată) - pentru nivelul de masterat;
- 4) Regimul disciplinei (obligativitate) - se alege una din variantele: DI (disciplină obligatorie)/ DO (disciplină opțională)/ DFac (disciplină facultativă);

## COURSE OUTLINE

### 1. Data about the study programme

|                                    |  |
|------------------------------------|--|
| 1.1 Higher education institution   | Transilvania University of Braşov  |
| 1.2 Faculty                        |  |
| 1.3 Department                     | Interdisciplinary Doctoral School  |
| 1.4 Field of study <sup>1)</sup>   | Mechanical Engineering, Industrial Engineering, Electrical Engineering, Computer and Information Technology, Electronic Engineering, Telecommunications and Information Technologies, Materials Engineering, Systems Engineering, Engineering and Management, Silviculture, Forest Engineering, Mathematics, Informatics, Marketing, Sports and Physical Education, Medicine |
| 1.5 Study level <sup>2)</sup>      | Doctoral   |
| 1.6 Study programme/ Qualification | Mechanical Engineering, Industrial Engineering, Electrical Engineering, Computer and Information Technology, Electronic Engineering, Telecommunications and Information Technologies, Materials Engineering, Systems Engineering, Engineering and Management, Silviculture, Forest Engineering, Mathematics, Informatics, Marketing, Sports and Physical Education, Medicine |

### 2. Data about the course

|                     |  |                   |   |                          |  |                      |                               |    |  |
|---------------------|--|-------------------|---|--------------------------|--|----------------------|-------------------------------|----|--|
| 2.1 Name of course  |  |                   | ENGLISH LANGUAGE IN SCIENCE (ELS-N1, beginners) |                          |  |                      |                               |    |  |
| 2.2 Course convenor |  |                   | Prof. Marinela Burada                           |                          |  |                      |                               |    |  |
| 2.3 Seminar         |  |                   | Prof. Marinela Burada                           |                          |  |                      |                               |    |  |

### 4. Prerequisites (if applicable)

|                         |       |
|-------------------------|-------|
| 4.1 curriculum-related  | • N/a |
| 4.2 competences-related | • N/a |

### 5. Conditions (if applicable)

|                            |  |
|----------------------------|--|
| 5.1 for course development | • multimedia teaching space, internet connection |
|----------------------------|--|

|                 |  |
|-----------------|--|
| 5.2 for seminar | <ul style="list-style-type: none"> <li>multimedia teaching space, internet connection</li> </ul> |
|-----------------|--|

## 6. Specific competences and learning outcomes

|                          |   |
|--------------------------|---|
| Professional competences | The students in this group will acquire a basic level of EL competence that lays the foundation for further competence development. |
| Transversal competence   | The students will develop their professional communication skills via teamwork.   |

## 7. Course objectives (resulting from the specific competences to be acquired)

|                              |  |
|------------------------------|--|
| 7.1 General course objective | Developing basic language abilities.<br>Introducing the basics of EL grammar with a focus on those L1 – L2 discrepancies that cause interference and error.  |
| 7.2 Specific objectives      | Developing the language used to describe people and objects and to formulate Q & As.<br>Developing a reticulated view of the distinctions afforded by the use of aspect i.e., progressive vs. non-progressive aspect.<br>Developing the language used to express possession and numbers. |

## 8. Content

| 8.1 Course  | Teaching methods                     | Number of hours | Remarks              |
|---|--------------------------------------|-----------------|----------------------|
| Primary Auxiliaries: be, have, do. Present Simple: affirmatives, interrogatives, negatives.                           | Lecturing                            | 2               | Interactive approach |
| Present vs. Present progressive   |                                      | 2               |                      |
| Possessives and numbers   |                                      | 2               |                      |
| <b>Selected bibliography</b>  |                                      |                 |                      |
| Bibliografie  |                                      |                 |                      |
| 1.Downing, Angela & Locke, Philip (2006) English Grammar. A University Course. London and New York: Routledge         |                                      |                 |                      |
| 2.Greenbaum, S.& Quirk, R. (1990) A Student's Grammar of the English Language. Longman                                |                                      |                 |                      |
| 3.Huddleston, Rodney & Pullum, Geoffrey K. (2002, 2006) The Cambridge Grammar of the English Language. Cambridge: CUP |                                      |                 |                      |
| 4.Quirk, R.,Greenbaum, S., Leech, G. & Svartvik, J. (1985) A Comprehensive Grammar of the English Language. Longman   |                                      |                 |                      |
| 8.2 Seminar   |                                      | Number of hours | Remarks              |
| Describing objectsand spetial relations   | drilling,<br>communicative<br>method | 2               | Interactive approach |
| Possessive pronouns in context  |                                      | 2               |                      |
| Numbers from 1 to 100   |                                      | 2               |                      |
| <b>Selected bibliography</b>  |                                      |                 |                      |
| 1. Downing, Angela & Locke, Philip (2006) English Grammar. A University Course. London and New York: Routledge        |                                      |                 |                      |
| 2. Jackson, Howard (2002) Grammar and Vocabulary. A resource book for students. London and New York: Routledge        |                                      |                 |                      |
| 3. Jacobs, A. Roderick (1995) English Syntax. A Grammar for English Language Professionals. Oxford University Press   |                                      |                 |                      |

## 9. Correlation of course content with the demands of the labour market (epistemic communities, professional associations, potential employers in the field of study)

F03.2-PS7.2-01/ed.3, rev.6

Students will be able to convey/understand simple messages in English

#### 10. Evaluation

| Activity type   | 10.1 Evaluation criteria   | 10.2 Evaluation methods | 10.3 Percentage of the final grade |
|---|--|-------------------------|------------------------------------|
| 10.4 Course   | Level of acquisition and understanding of theoretical concepts   | exam                    | 100%                               |
| 10.5 Seminar/ laboratory/ project   | Ability to implement the above in communication at a basic level |                         |                                    |
| 10.6 Minimal performance standard   |  |                         |                                    |
| <ul style="list-style-type: none"><li>• The ability to negotiate basic, grammatically accurate messages in English.</li></ul> |  |                         |                                    |

This course outline was certified in the Interdisciplinary Council meeting on 18.11.2025 and approved by CSUD on 19.11.2025

### 3. Total estimated time (hours of teaching activities per semester)

|   |    |                           |   |                                  |       |
|---|----|---------------------------|---|----------------------------------|-------|
| 3.1 Number of hours per week  | 2  | out of which: 3.2 lecture | 1 | 3.3 seminar/ laboratory/ project | 1     |
| 3.4 Total number of hours in the curriculum   | 12 | out of which: 3.5 lecture | 6 | 3.6 seminar/ laboratory/ project | 6     |
| Time allocation   |    |                           |   |                                  | hours |
| Study of textbooks, course support, bibliography and notes                                  |    |                           |   |                                  | 40    |
| Additional documentation in libraries, specialized electronic platforms, and field research |    |                           |   |                                  | 40    |
| Preparation of seminars/ laboratories/ projects, homework, papers, portfolios, and essays   |    |                           |   |                                  | 28    |
| Tutorial  |    |                           |   |                                  | 2     |
| Examinations  |    |                           |   |                                  | 3     |
| Other activities.....   |    |                           |   |                                  | =     |
| 3.7 Total number of hours of student activity   |    | 113                       |   |                                  |       |
| 3.8 Total number per semester   |    | 125                       |   |                                  |       |
| 3.9 Number of credits <sup>5)</sup>   |    | 5                         |   |                                  |       |

### 4. Prerequisites (if applicable)

|                         |   |
|-------------------------|---|
| 4.1 curriculum-related  | • N/a   |
| 4.2 competences-related | • Upper-intermediate to proficient EL level (reading, speaking, listening, writing) |

### 5. Conditions (if applicable)

|                            |  |
|----------------------------|--|
| 5.1 for course development | • multimedia teaching space, internet connection |
|----------------------------|--|

|                 |  |
|-----------------|--|
| 5.2 for seminar | <ul style="list-style-type: none"> <li>multimedia teaching space, internet connection</li> </ul> |
|-----------------|--|

## 6. Specific competences and learning outcomes

|                          |   |
|--------------------------|---|
| Professional competences | The students in this group will develop further (1) their professional communication skills, particularly their ability to recognize macro-and microstructural peculiarities of text types subsumed under the academic discourse; (2) the linguistic and rhetoric competencies needed in order to conduct research in one's own field; (3) the theoretical foundation necessary to determine and internalise the rhetorical patterns in texts composed in Romanian and English. |
| And Transversal          | The students will develop their professional communication skills and their metacognitive abilities that would enable them to capitalize on their strong points, while meeting the challenges in the communication conducted in their respective fields.  |

## 7. Course objectives (resulting from the specific competences to be acquired)

|                              |   |
|------------------------------|---|
| 7.1 General course objective | Developing the Ss: study skills, professional communication and dissemination related abilities.  |
| 7.2 Specific objectives      | <p>Developing the S's ability to process information from specialist texts and to write such texts in keeping with the communication patterns and norms associated with their domain.</p> <p>Honing the Ss' study skills in English.</p> <p>Honing the Ss' abilities to communicate and disseminate the results of their research in keeping with the norms and expectations of to which they belong.</p> |

## 8. Content

| 8.1 Course  | Teaching methods              | Number of hours | Remarks |
|---|-------------------------------|-----------------|---------|
| Collecting and structuring information; using sources.  | Mixed: Lecturing, interactive | 2               |         |
| Drafting abstracts.   |                               | 2               |         |
| Preparing and delivering oral presentations.  |                               | 2               |         |
| <b>Selected bibliography</b>  |                               |                 |         |
| Barton, D. (1994) Literacy. An Introduction to the Ecology of Written Language. Blackwell.Carter, Susan., Guerin, C. & Aitchinson, C. (2020) Doctoral Writing. Practices, Processes and Pleasures. Springer.        |                               |                 |         |
| Guest, Michael (2018) Conferencing and Presentation for Young Academics. Springer.  |                               |                 |         |

**9. Correlation of course content with the demands of the labour market (epistemic communities, professional associations, potential employers in the field of study)**

Students will be able to communicate effectively in professional settings, in keeping with the interactional patterns specific of the international epistemic communities.

**10. Evaluation**

| Activity type   | 10.1 Evaluation criteria                                       | 10.2 Evaluation methods | 10.3 Percentage of the final grade |
|---|--|-------------------------|------------------------------------|
| 10.4 Course   | Level of acquisition and understanding of theoretical concepts | exam                    | 100%                               |
| 10.5 Seminar/ laboratory/ project   | Ability to implement the above in a written/spoken text        |                         |                                    |
| 10.6 Minimal performance standard   |  |                         |                                    |
| <ul style="list-style-type: none"><li>The ability to write a scientific text in keeping with the academic norms of the discipline; familiarity with the basic concepts associated with the discipline..</li></ul> |  |                         |                                    |

This course outline was certified in the Interdisciplinary Council meeting on 18.11.2025 and approved by CSUD on 19.11.2025

## COURSE OUTLINE

### 1. Data about the study programme

|                                    |  |
|------------------------------------|--|
| 1.1 Higher education institution   | Transilvania University of Braşov  |
| 1.2 Faculty                        |  |
| 1.3 Department                     | Interdisciplinary Doctoral School  |
| 1.4 Field of study <sup>1)</sup>   | All the fields of study, according to the Curriculum   |
| 1.5 Study level <sup>2)</sup>      | PhD  |
| 1.6 Study programme/ Qualification | Mechanical Engineering, Industrial Engineering, Electrical Engineering, Computers and Information Technology, Electronics, Telecommunications and Informational Technologies, Materials Engineering, Systems Engineering, Engineering and management, Forestry, Forest Engineering, Automotive Engineering, Environmental Engineering, Mechatronics and Robotics, Civil Engineering and Building Services, Mathematics, Computer Science, Marketing, Science of Sport and Physical Education, Medicine, Finance, Sociology, Management |

### 2. Data about the course

|   |                                       |              |   |                     |   |                   |                               |     |
|---|---------------------------------------|--------------|---|---------------------|---|-------------------|-------------------------------|-----|
| 2.1 Name of course                        | English Language in Science (level 2) |              |   |                     |   |                   |                               |     |
| 2.2 Course convenor                       | Associate Prof. Dr. Raluca Sinu       |              |   |                     |   |                   |                               |     |
| 2.3 Seminar/ laboratory/ project convenor | Associate Prof. Dr. Raluca Sinu       |              |   |                     |   |                   |                               |     |
| 2.4 Study year                            | I                                     | 2.5 Semester | I | 2.6 Evaluation type | C | 2.7 Course status | Content <sup>3)</sup>         | CC  |
|   |                                       |              |   |                     |   |                   | Attendance type <sup>4)</sup> | CPC |

### 3. Total estimated time (hours of teaching activities per semester)

|   |    |                           |   |                                  |       |
|---|----|---------------------------|---|----------------------------------|-------|
| 3.1 Number of hours per week  | 2  | out of which: 3.2 lecture | 1 | 3.3 seminar/ laboratory/ project | 1     |
| 3.4 Total number of hours in the curriculum   | 12 | out of which: 3.5 lecture | 6 | 3.6 seminar/ laboratory/ project | 6     |
| Time allocation   |    |                           |   |                                  | hours |
| Study of textbooks, course support, bibliography and notes                                  |    |                           |   |                                  | 40    |
| Additional documentation in libraries, specialized electronic platforms, and field research |    |                           |   |                                  | 40    |
| Preparation of seminars/ laboratories/ projects, homework, papers, portfolios, and essays   |    |                           |   |                                  | 28    |
| Tutorial  |    |                           |   |                                  | 2     |
| Examinations  |    |                           |   |                                  | 3     |
| Other activities  |    |                           |   |                                  | -     |
| 3.7 Total number of individual study hours  |    | 113                       |   |                                  |       |
| 3.8 Total number per semester   |    | 125                       |   |                                  |       |
| 3.9 Number of credits <sup>5)</sup>   |    | 5                         |   |                                  |       |

### 4. Prerequisites (if applicable)

|                         |   |
|-------------------------|---|
| 4.1 curriculum-related  | <ul style="list-style-type: none"> <li>Intermediary level of English</li> </ul> |
| 4.2 competences-related | <ul style="list-style-type: none"> <li>Individual study skills</li> </ul>       |

### 5. Conditions (if applicable)

|  |   |
|--|---|
| 5.1 for course development                       | <ul style="list-style-type: none"> <li>Room with projector</li> </ul> |
| 5.2 for seminar/ laboratory/ project development | <ul style="list-style-type: none"> <li></li> </ul>                    |

## 6. Specific competences

|                          |   |
|--------------------------|---|
| Professional competences | <ul style="list-style-type: none"> <li>Using English adequately in scientific contexts</li> <li>Applying English to the study of specialized texts, to the translation of research articles and to their presentation at international conferences</li> </ul> |
| Transversal competences  | <ul style="list-style-type: none"> <li>Identifying and using efficient methods in the study of English</li> </ul>   |

## 7. Course objectives (resulting from the specific competences to be acquired)

|                              |  |
|------------------------------|--|
| 7.1 General course objective | <ul style="list-style-type: none"> <li>Consolidating and developing the students' repertoire of English</li> <li>Applying the students' knowledge of English to scientific contexts</li> </ul>               |
| 7.2 Specific objectives      | <ul style="list-style-type: none"> <li>Recognizing and using adequately the verbal tenses in academic texts in English</li> <li>Rendering qualities and quantities in scientific texts in English</li> </ul> |

## 8. Content

| 8.1 Lecture   | Teaching methods          | No. of hours | Remarks |
|---|---------------------------|--------------|---------|
| Verbal tenses   | Discussions and examples  | 4            |         |
| The adjective   | Discussions and examples  | 1            |         |
| Expressions of quantity   | Discussions and examples  | 1            |         |

### Note:

- 1) Field of study – select one of the following options: BA/MA/PhD. (to be filled in according to the forceful classification list for study programmes);
- 2) Study level – choose from among: BA/MA/PhD.;
- 3) Course status (content) – for the BA level, select one of the following options: FC (fundamental course) / DC (course in the study domain)/ SC (speciality course)/ CC (complementary course); for the MA level, select one of the following options: PC (proficiency course)/ SC (synthesis course)/ AC (advanced course)
- 4) Course status (attendance type) – select one of the following options: CPC (compulsory course)/ EC (elective course)/ NCPC (non-compulsory course);
- 5) One credit is the equivalent of 25 – 30 study hours (teaching activities and individual study).

# COURSE OUTLINE

## 1. Data about the study programme

|                                    |                                   |
|------------------------------------|-----------------------------------|

**9. Correlation of course content with the demands of the labour market (epistemic communities, professional associations, potential employers in the field of study)**

The aim of the course is to acknowledge the importance of ethics in scientific research. The course will focus on familiarizing students with the responsible assessment of ethical behaviour norms in the academic area and will allow students to attain a higher level of understanding and proficiency in writing an academic text.

**10. Evaluation**

| Activity type  | 10.1 Evaluation criteria                              | 10.2 Evaluation methods | 10.3 Percentage of the final grade |
|--|---|-------------------------|------------------------------------|
| 10.4 Course  | Writing abilities and analytical skills               | Final paper             | 70%                                |
|  | Comprehensiveness of analysis and analytic reflection | In-class evaluation     | 15%                                |
| 10.5 Seminar/ laboratory/ project  | Analytic reflection                                   | In-class evaluation     | 15%                                |
|  |   |                         |                                    |
| 10.6 Minimal performance standard  |   |                         |                                    |
| <ul style="list-style-type: none"> <li>The students must identify an issue of academic integrity or research ethics. In this regard they have to present the problem, to explain why it is a matter of ethics and integrity, to identify the causes and the effects of the phenomenon, to evaluate it (taking in consideration the ethical evaluation theories) and to identify some solutions for solving the problem.</li> </ul> |   |                         |                                    |

This Course Outline was approved by the Council of the Interdisciplinary Doctoral School (SDI) on 18 November 2025 and approved by the Council for Doctoral Studies (CSUD) on 19 November 2025.

Note:

- 1) Field of study – select one of the following options: Bachelor / Master / Doctorat (to be filled in according to the forceful classification list for study programmes);
- 2) Study level – choose from among: Bachelor / Master / Doctorat;
- 3) Course status (content) – for the Bachelor level, select one of the following options: FC (fundamental course) / DC (course in the study domain)/ SC (speciality course)/ CC (complementary course); for the Master level, select one of the following options: PC (proficiency course)/ SC (synthesis course)/ AC (advanced course);

- <sup>4)</sup> Course status (attendance type) – select one of the following options: **CPC** (compulsory course)/ **EC** (elective course)/ **NCPC** (non-compulsory course);
- <sup>5)</sup> One credit is the equivalent of 25 study hours (teaching activities and individual study).

## FIȘA DISCIPLINEI

### 1. Date despre program

|   |  |
|---|--|
| 1.1 Instituția de învățământ superior         | Universitatea Transilvania din Brașov  |
| 1.2 Facultatea                                | -  |
| 1.3 Departamentul                             | Școala Doctorală Interdisciplinară   |
| 1.4 Domeniul de studii doctoral <sup>1)</sup> | Calculatoare, Filologie, Finante, Marketing, Matematică și informatică, Medicină, Muzică, Știința sportului și educației fizice, Silvicultura, Sociologie, Științe ingineresti (toate domeniile) |
| 1.5 Ciclul de studii <sup>2)</sup>            | Doctorat   |
| 1.6 Programul de studii/<br>Calificarea       | Toate domeniile/ programele de doctorat ale SDI  |

### 2. Date despre disciplină

|  |                                |               |   |                       |   |                         |  |
|--|--------------------------------|---------------|---|-----------------------|---|-------------------------|--|
| 2.1 Denumirea disciplinei                                  | ETICĂ ȘI INTEGRITATE ACADEMICĂ |               |   |                       |   |                         |  |
| 2.2 Titularul activităților de curs                        | Prof.dr. habil. Elena Cocoradă |               |   |                       |   |                         |  |
| 2.3 Titularul activităților de seminar/ laborator/ proiect | Prof.dr. habil. Elena Cocoradă |               |   |                       |   |                         |  |
| 2.4 Anul de studiu   | I                              | 2.5 Semestrul | I | 2.6 Tipul de evaluare | E | 2.7 Regimul disciplinei | Conținut <sup>3)</sup> DCA<br>Obligatorietate <sup>3)</sup> DI |

### 3. Timpul total estimat (ore pe semestru al activităților didactice)

|  |     |           |     |             |          |
|--|-----|-----------|-----|-------------|----------|
| 3.1 Număr de ore pe săptămână (6 săptămâni)  | 2,5 | din care: | 1,5 | 3.3 seminar | 1        |
| 3.4 Total ore din planul de învățământ   | 15  | din care: | 9   | 3.6 seminar | 6 /grupa |
|  |     | 3.2 curs  |     |             |          |
|  |     | 3.5 curs  |     |             |          |
| Distribuția fondului de timp   |     |           |     |             | ore      |
| Studiul după manual, suport de curs, bibliografie și notițe                                    |     |           |     |             | 35       |
| Documentare suplimentară în bibliotecă, pe platformele electronice de specialitate și pe teren |     |           |     |             | 35       |
| Pregătire seminare/ laboratoare/ proiecte, teme, referate, portofolii și eseuri                |     |           |     |             | 35       |
| Tutoriat   |     |           |     |             | 2        |
| Examinări  |     |           |     |             | 3        |
| Alte activități.....   |     |           |     |             |          |
| 3.7 Total ore de activitate a studentului  |     | 110       |     |             |          |
| 3.8 Total ore pe semestru  |     | 125       |     |             |          |
| 3.9 Numărul de credite <sup>5)</sup>   |     | 5         |     |             |          |

### 4. Precondiții (acolo unde este cazul)

|                   |                 |
|-------------------|-----------------|
| 4.1 de curriculum | • Nu este cazul |
| 4.2 de competențe | • Nu este cazul |

### 5. Condiții (acolo unde este cazul)

|  |  |
|--|--|
| 5.1 de desfășurare a cursului                                | • Acces la platforma e-Learning și videoconferința, acces la internet și BDI, PC |
| 5.2 de desfășurare a seminarului/ laboratorului/ proiectului | • Acces la platforma e-Learning și videoconferința, acces la internet și BDI, PC |

### 6. Competențe specifice acumulate

|                         |   |
|-------------------------|---|
| Competențe profesionale | <ul style="list-style-type: none"> <li>Evaluarea independentă a unei cercetări științifice și a unei lucrări din domeniul de doctorat specific, folosind valorile, principiile și normele etice și de integritate academică</li> <li>Aplicarea valorilor, principiilor și normelor etice și de integritate academică în proiectarea, desfășurarea și diseminarea rezultatelor unei cercetări științifice din domeniul de doctorat specific</li> </ul> |
|-------------------------|---|

|                         |  |
|-------------------------|--|
| Competențe transversale | <ul style="list-style-type: none"> <li>• Aplicarea autonomă a normelor etice și de integritate academică în proiectarea, desfășurarea și diseminarea rezultatelor unei cercetări științifice</li> <li>• Asumarea responsabilității față de respectarea normelor de etică și integritate în întreaga viață academică</li> </ul> |
|-------------------------|--|

## 7. Obiectivele disciplinei (reieșind din competențele specifice acumulate)

|                                       |   |
|---------------------------------------|---|
| 7.1 Obiectivul general al disciplinei | Studentii vor fi capabili să aplice independent și responsabil principiile și normele etice și de integritate academică în proiectarea, implementarea, evaluarea și diseminarea unei cercetări științifice în domeniile doctorale în care sunt înscriși și în domenii conexe.   |
| 7.2 Obiectivele specifice             | <ul style="list-style-type: none"> <li>• Să analizeze, critic și independent, problemele și soluțiile etice prezente într-o cercetare științifică data în domeniului doctoral propriu, folosind teorii, concepte, standarde, legi.</li> <li>• Să descrie soluții corecte etic în proiectarea și derularea unei cercetări științifice</li> <li>• Să descrie soluții corecte etic în redactarea și diseminarea unei lucrări științifice</li> <li>• Să evalueze /autoevalueze responsabil respectarea normelor de conduită etică în predare-invatare-evaluare și în colaborarea echipelor de cercetare</li> <li>• Să argumenteze coerent deciziile personale în toate situațiile descrise mai sus, folosind teorii, concepte, norme, legi din domeniu</li> </ul> |

## 8. Conținuturi

| 8.1 Curs  | Metode de predare   | Număr de ore | Observații |
|---|---|--------------|------------|
| 1. Abordări filosofice, istorice și instituționale ale eticii în cercetarea științifică și viața academică. Teoria consecințelor, etica datoriei, etica bazată pe drepturi, virtuții și îngrijire | Prelegere îmbunătățită prin slide-uri, studii de caz, dezbateri, activitate în grupuri mici | 2            |            |
| 2. Etică și responsabilitate în protejarea participanților la cercetare, a datelor personale și a calitatii cercetării științifice. Violarea normelor de etică                                    |   | 2            |            |
| 3. Rezolvarea problemelor etice specifice diferitelor domenii. Abordări actuale ale evaluării etice în domenii științifice noi (ex.AI)  |   | 2            |            |
| 4. Dimensiunea etică a diseminării și publicării rezultatelor cercetării științifice  |   | 2            |            |
| 5. Integritate și egalitate de gen în viața academică. Dileme etice, pattern-uri comportamentale și factori de risc   |   | 1            |            |

**9. Coroborarea conținuturilor disciplinei cu așteptările reprezentanților comunităților epistemice, ale asociațiilor profesionale și ale angajatorilor reprezentativi din domeniul aferent programului**

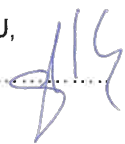

Disciplina este în acord cu orientările teoretice actuale, cu legislația românească și europeană și cu politica UNITBv privind etica cercetării științifice, a publicării rezultatelor și a normelor de integritate din viața academică.

**10. Evaluare**

| Tip de activitate   | 10.1 Criterii de evaluare  | 10.2 Metode de evaluare  | 10.3 Pondere din nota finală |
|---|--|--|------------------------------|
| 10.4 Curs   | <ul style="list-style-type: none"> <li>Analiza, din perspectivă etică, a unei cercetări prin raportare la valori, principii și standarde etice și de integritate</li> <li>Argumentarea abaterilor etice într-o lucrare științifică dată prin raportare la valori, teorii, norme etice</li> <li>Propunerea argumentată de soluții corective la abaterile etice, în acord cu principiile și normele de etică și de integritate academică</li> <li>Propunerea de soluții adecvate etic pentru rezolvarea unor dileme etice într-o cercetare /situație dată</li> </ul> | Examen scris: analizei unei cercetări științifice / a unui articol din perspectiva respectării principiilor și normelor de etică, cu propunerea de soluții etice corective<br><br><i>Lucrarile vor fi postate pe platforma elearning</i> | 70%                          |
| 10.5 Seminar  | Aceleași criterii ca și în evaluarea cursului<br>Implicare responsabilă în activități  | Observarea activității<br>Interevaluare  | 30%                          |
| 10.6 Standard minim de performanță: identificarea și explicarea a 4 încălcări ale normelor de etică a cercetării științifice într-un caz dat și descrierea, argumentată, a câte unei soluții acceptabile etic pentru fiecare. |  |  |                              |

Prezenta Fișă de disciplină a fost avizată în ședința de Consiliul SDI din data de 18.11.2025 și aprobată de CSUD în data de 19.11.2025.

Prof.dr. ing. Cătălin ALEXANDRU,  
Directorul CSUD.....

Prof. dr. Mona Brigitte ARHIRE,  
Directorul SDI .....

Prof. dr. Elena COCORADĂ,  
Titulara de curs

Prof. dr. Elena COCORADĂ,  
Titulara de seminar

**Notă:**

- 1) Domeniul de studii - se alege una din variantele: Licență/ Masterat/ Doctorat (se completează conform cu Nomenclatorul domeniilor și al specializărilor/ programelor de studii universitare în vigoare);
- 2) Ciclu de studii - se alege una din variantele: Licență/ Masterat/ Doctorat;
- 3) Regimul disciplinei (conținut) - se alege una din variantele: DF (disciplină fundamentală)/ DD (disciplină din domeniu)/ DS (disciplină de specialitate)/ DC (disciplină complementară) - pentru nivelul de licență; DAP (disciplină de aprofundare)/ DSI (disciplină de sinteză)/ DCA (disciplină de cunoaștere avansată) - pentru nivelul de masterat;
- 4) Regimul disciplinei (obligativitate) - se alege una din variantele: DI (disciplină obligatorie)/ DO (disciplină opțională)/ DFac (disciplină facultativă);
- 5) Un credit este echivalent cu 25 – 30 de ore de studiu (activități didactice și studiu individual).

## FIȘA DISCIPLINEI

### 1. Date despre program

|  |                                       |
|--|---------------------------------------|

### 3. Timpul total estimat (ore pe semestru al activităților didactice)

|  |    |                    |   |                                 |     |
|--|----|--------------------|---|---------------------------------|-----|
| 3.1 Număr de ore pe săptămână  |    | din care: 3.2 curs |   | 3.3 seminar/ laborator/ proiect |     |
| 3.4 Total ore din planul de învățământ   | 12 | din care: 3.5 curs | 6 | 3.6 seminar/ laborator/ proiect | 6   |
| Distribuția fondului de timp   |    |                    |   |                                 | ore |
| Studiul după manual, suport de curs, bibliografie și notițe                                    |    |                    |   |                                 | 16  |
| Documentare suplimentară în bibliotecă, pe platformele electronice de specialitate și pe teren |    |                    |   |                                 | 16  |
| Pregătire seminare/ laboratoare/ proiecte, teme, referate, portofolii și eseuri                |    |                    |   |                                 | 8   |
| Tutoriat   |    |                    |   |                                 | 2   |
| Examinări  |    |                    |   |                                 | 2   |
| Alte activități  |    |                    |   |                                 | -   |
| 3.7 Total ore de activitate a studentului  | 44 |                    |   |                                 |     |
| 3.8 Total ore pe semestru  | 44 |                    |   |                                 |     |
| 3.9 Numărul de credite <sup>5)</sup>   |    |                    |   |                                 |     |

### 4. Precondiții (acolo unde este cazul)

|                   |   |
|-------------------|---|
| 4.1 de curriculum | •Notiuni de baza in domeniul temei de doctorat.Notiuni de baza privind analiza muticriteriala |
| 4.2 de competențe | •Capacitatea de a analiza si de a sintetiza informațiile din baze de date                     |

### 5. Condiții (acolo unde este cazul)

|                                  |   |
|----------------------------------|---|
| 5.1 de desfășurare a cursului    | •sala de curs dotata cu videoproiector si acces la internet |
| 5.2 de desfășurare a seminarului | •sala de curs dotata cu videoproiector si acces la internet |

### 6. Competențe specifice acumulate

|                         |  |
|-------------------------|--|
| Competențe profesionale | Însușirea noțiunilor de baza privind proprietatea intelectuala si industrială.<br>Dobândirea cunoștințelor necesare pentru identificarea/recunoașterea elementelor de proprietate intelectuala /industrială.<br>Dobândirea cunoștințelor necesare pentru constituirea/înregistrarea dreptului de proprietate asupra creațiilor intelectuale(dreptul de autor) si industriale( invenții, mărci, desene si modele industriale, modele de utilitate)<br>Formarea deprinderii privind cercetarea documentara in baze de date disponibile(portaluri internet, aplicații software de specialitate, baze de date brevet si non brevet, cursuri online etc.)in domeniul specific temei de doctorat |
| Competențe transversale | Cunoașterea normelor legale în domeniul constituirii dreptului de proprietate asupra creației intelectuale si industriale<br>Capacitatea de auto-organizare, de stabilire a obiectivelor și de planificare a activităților.<br>Însușirea stilului de muncă responsabil   |

7. Obiectivele disciplinei (reieșind din competențele specifice acumulate)

|                                       |  |
|---------------------------------------|--|
| 7.1 Obiectivul general al disciplinei | •Dobândirea abilităților privind cercetarea in bazele de date brevet si non brevet in domeniul specific studiilor doctorale proprii  |
| 7.2 Obiectivele specifice             | •Dobândirea abilității de valorificare/structurare a informațiilor rezultate din cercetarea documentara, de identificare a soluțiilor optime rezultate prin analiza multicriteriala .<br>Inițierea unei baze de date proprii in domeniul specific lucrării de doctorat |

8. Conținuturi

| 8.1 Curs   | Metode de predare  | Număr de ore | Observații |
|--|--|--------------|------------|
| Proprietatea Intelectuală; Forme de constituire și de protecție..                  | Prelegere clasică, prelegere pe baza prezentării .ppt, demonstrație didactică,                                       | 2            |            |
| Brevetul de invenție; invenția brevetabilă; structura unei Descrieri de Invenție.. | Prelegere clasică, prelegere pe baza prezentării<br>Indrumarului de descriere de invenție<br>demonstrație didactică, | 2            |            |
| Informația ca resursă. Baze de date. Cercetări documentare.                        | prelegere clasică, prelegere pe baza prezentării .ppt, demonstrație interactiva                                      | 2            |            |
|  |  |              |            |
|  |  |              |            |
|  |  |              |            |

## Notă:

- 1) Domeniul de studii - se alege una din variantele: Licență/ Masterat/ Doctorat (se completează conform cu Nomenclatorul domeniilor și al specializărilor/ programelor de studii universitare în vigoare);
- 2) Ciclul de studii - se alege una din variantele: Licență/ Masterat/ Doctorat;
- 3) Regimul disciplinei (conținut) - se alege una din variantele: DF (disciplină fundamentală)/ DD (disciplină din domeniu)/ DS (disciplină de specialitate)/ DC (disciplină complementară) - pentru nivelul de licență; DAP (disciplină de aprofundare)/ DSI (disciplină de sinteză)/ DCA (disciplină de cunoaștere avansată) - pentru nivelul de masterat;
- 4) Regimul disciplinei (obligativitate) - se alege una din variantele: DI (disciplină obligatorie)/ DO (disciplină opțională)/ DFac (disciplină facultativă);
- 5) Un credit este echivalent cu 25 – 30 de ore de studiu (activități didactice și studiu individual).

## COURSE OUTLINE

### 1. Data about the study programme

|                                    |                                   |
|------------------------------------|-----------------------------------|
| 1.1 Higher education institution   | Transilvania University of Braşov |
| 1.2 Faculty                        |                                   |
| 1.3 Department                     | Interdisciplinary Doctoral School |
| 1.4 Field of study <sup>1)</sup>   |                                   |
| 1.5 Study level <sup>2)</sup>      | PhD                               |
| 1.6 Study programme/ Qualification |                                   |

### 2. Data about the course

### 3. Total estimated time (hours of teaching activities per semester)

|   |    |                           |   |                                  |       |
|---|----|---------------------------|---|----------------------------------|-------|
| 3.1 Number of hours per week (6 weeks)  | 2  | out of which: 3.2 lecture | 1 | 3.3 seminar/ laboratory/ project | 1     |
| 3.4 Total number of hours in the curriculum   | 12 | out of which: 3.5 lecture | 6 | 3.6 seminar/ laboratory/ project | 6     |
| Time allocation   |    |                           |   |                                  | hours |
| Study of textbooks, course support, bibliography and notes                                  |    |                           |   |                                  | 30    |
| Additional documentation in libraries, specialized electronic platforms, and field research |    |                           |   |                                  | 50    |
| Preparation of seminars/ laboratories/ projects, homework, papers, portfolios, and essays   |    |                           |   |                                  | 27    |
| Tutorial  |    |                           |   |                                  | 2     |
| Examinations  |    |                           |   |                                  | 4     |
| Other activities  |    |                           |   |                                  |       |
| 3.7 Total number of individual study hours  |    | 113                       |   |                                  |       |
| 3.8 Total number per semester   |    | 12                        |   |                                  |       |
| 3.9 Number of credits <sup>5)</sup>   |    | 125                       |   |                                  |       |

### 4. Prerequisites (if applicable)

|                         |     |
|-------------------------|-----|
| 4.1 curriculum-related  | • - |
| 4.2 competences-related | • - |

### 5. Conditions (if applicable)

|  |   |
|--|---|
| 5.1 for course development                       | • Course room, with video projector and internet connexion            |
| 5.2 for seminar/ laboratory/ project development | • Computer room, with PC for PhD students and with internet connexion |

### 6. Specific competences

|                          |  |
|--------------------------|--|
| Professional competences | <ul style="list-style-type: none"> <li>Performing calculations and demonstrations to solve specific industrial engineering tasks based on knowledge from fundamental sciences</li> <li>Associating knowledge, principles and methods from the technical sciences of the field with graphic representations to solve specific tasks.</li> </ul>                         |
| Transversal competences  | <ul style="list-style-type: none"> <li>Applying the values and ethics of the engineering profession and responsible execution of professional tasks under conditions of limited autonomy and qualified assistance. Promoting logical, convergent and divergent reasoning, the practical applicability of evaluation and self-evaluation in decision-making.</li> </ul> |

### 7. Course objectives (resulting from the specific competences to be acquired)

F03.1-PS7.2-01/ed.3, rev.3

|                              |  |
|------------------------------|--|
| 7.1 General course objective | <ul style="list-style-type: none"> <li>Learning the skills necessary for the elaboration, development, optimization and coordination of projects specific to the field.</li> </ul>   |
| 7.2 Specific objectives      | <ul style="list-style-type: none"> <li>Identifying methods for accessing projects;</li> <li>Developing skills necessary for project development;</li> <li>Developing skills for identifying weaknesses/strengths in a project;</li> <li>Developing project coordination skills.</li> </ul> |

## 8. Content

| 8.1 Lecture   | Teaching methods          | No. of hours | Remarks |
|---|---------------------------|--------------|---------|
| Identification of priority areas with international funding.  | Lecture                   | 1            |         |
| Choosing the right project type vs. funding source  | Explanation               |              |         |
| Developing the primary structure of the project   | Heuristic conversation    | 1            |         |
| Identifying objectives/activities/deliverables  | Algorithmization          |              |         |
| Project budget development  | Problematization          | 1            |         |
| Performance indicators  | Case study                |              |         |
|   |                           | 1            |         |

## 9. Correlation of course content with the demands of the labour market (epistemic communities, professional associations, potential employers)

|   |
|---|
| The content of the discipline is in line with the demands of specific national professional associations. |
|---|

## 10. Evaluation

| Activity type  | 10.1 Evaluation criteria   | 10.2 Evaluation methods | 10.3 Percentage of the final grade |
|--|--|-------------------------|------------------------------------|
| 10.4 Lecture   | Correct use of project-specific concepts, terms, notions, algorithms and symbols | On-going                | 30%                                |
| 10.5 Seminar/ laboratory/ project  | Project proposal development   | Examination             | 70%                                |
| 10.6 Minimal performance standard  |  |                         |                                    |
| <ul style="list-style-type: none"> <li>Mastering the basic elementary notions of the discipline; mastering basic application skills and testing them.</li> </ul> |  |                         |                                    |

This Course Outline was approved by the Council of the Interdisciplinary Doctoral School (SDI) on 18 November 2025 and approved by the Council for Doctoral Studies (CSUD) on 19 November 2025.

**Note:**

- 1) Field of study – select one of the following options: BA/MA/PhD. (to be filled in according to the forceful classification list for study programmes);
- 2) Study level – choose from among: BA/MA/PhD.;
- 3) Course status (content) – for the BA level, select one of the following options: FC (fundamental course) / DC (course in the study domain)/ SC (speciality course)/ CC (complementary course); for the MA level, select one of the following options: PC (proficiency course)/ SC (synthesis course)/ AC (advanced course)
- 4) Course status (attendance type) – select one of the following options: CPC (compulsory course)/ EC (elective course)/ NCPC (non-compulsory course);
- 5) One credit is the equivalent of 25 – 30 study hours (teaching activities and individual study).

## COURSE OUTLINE

### 1. Data about the study programme

|                                       |                                   |
|---------------------------------------|-----------------------------------|
| 1.1 Higher education institution      | Transilvania University of Braşov |
| 1.2 Faculty                           |                                   |
| 1.3 Department                        | Interdisciplinary Doctoral School |
| 1.4 Field of study <sup>1)</sup>      | Engineering                       |
| 1.5 Study level <sup>2)</sup>         | PhD                               |
| 1.6 Study programme/<br>Qualification |                                   |

### 2. Data about the course

|                     |                                |              |   |                     |   |                   |                               |
|---------------------|--------------------------------|--------------|---|---------------------|---|-------------------|-------------------------------|
| 2.1 Name of course  | Statistics in research         |              |   |                     |   |                   |                               |
| 2.2 Course convenor | Prof. Dr. Ion Catalin Petritan |              |   |                     |   |                   |                               |
| 2.3 Seminar         | Prof. Dr. Ion Catalin Petritan |              |   |                     |   |                   |                               |
| 2.4 Study year      | I                              | 2.5 Semester | I | 2.6 Evaluation type | E | 2.7 Course status | Content <sup>3)</sup>         |
|                     |                                |              |   |                     |   |                   | Attendance type <sup>4)</sup> |
|                     |                                |              |   |                     |   |                   | EC                            |

### 3. Total estimated time (hours of teaching activities per semester)

|   |    |                           |   |             |       |
|---|----|---------------------------|---|-------------|-------|
| 3.1 Number of hours per week  | 2  | out of which: 3.2 lecture | 1 | 3.3 seminar | 1     |
| 3.4 Total number of hours in the curriculum   | 12 | out of which: 3.5 lecture | 6 | 3.6 seminar | 6     |
| Time allocation   |    |                           |   |             | hours |
| Study of textbooks, course support, bibliography and notes                                  |    |                           |   |             | 20    |
| Additional documentation in libraries, specialized electronic platforms, and field research |    |                           |   |             | 52    |
| Preparation of seminars/ laboratories/ projects, homework, papers, portfolios, and essays   |    |                           |   |             | 30    |
| Tutorial  |    |                           |   |             | 5     |
| Examinations  |    |                           |   |             | 6     |
| Other activities  |    |                           |   |             |       |
| 3.7 Total number of individual study hours  |    | 113                       |   |             |       |
| 3.8 Total number per semester   |    | 125                       |   |             |       |
| 3.9 Number of credits <sup>5)</sup>   |    | 5                         |   |             |       |

### 4. Prerequisites (if applicable)

|                         |   |
|-------------------------|---|
| 4.1 curriculum-related  | • |
| 4.2 competences-related | • |

### 5. Conditions (if applicable)

|                            |                              |
|----------------------------|------------------------------|
| 5.1 for course development | • Active attendance at class |
| 5.2 for seminar            | • Active attendance at class |

### 6. Specific competences

|                          |  |
|--------------------------|--|
| Professional competences | <ul style="list-style-type: none"> <li>Exploring the advantages offered by modern statistical analysis for evaluating the structure and functioning of engineering systems.</li> </ul> |
|--------------------------|--|

|                         |   |
|-------------------------|---|
| Transversal competences | <ul style="list-style-type: none"> <li>• Ensuring that doctoral students understand statistical methods and concepts</li> <li>• Supporting students in understanding the interpretation of statistical results</li> <li>• Engaging in active and direct learning of doctoral students for professional career preparation</li> <li>• Use of information and communication technology</li> <li>• Communication skills, written and oral, in the field of engineering sciences</li> </ul> |
|-------------------------|---|

## 7. Course objectives (resulting from the specific competences to be acquired)

|                              |  |
|------------------------------|--|
| 7.1 General course objective | <ul style="list-style-type: none"> <li>• Developing cross-disciplinary skills in statistical analysis of phenomena and processes in the field of engineering</li> </ul>  |
| 7.2 Specific objectives      | <ul style="list-style-type: none"> <li>• Training in cross-disciplinary skills related to the use of computer systems for statistical data analysis</li> <li>• Training in multivariate data analysis skills.</li> <li>• Training in skills related to the use of statistical analysis results in scientific papers and the dissemination of those results.</li> </ul> |

## 8. Content

| 8.1 Lecture   | Teaching methods     | No. of hours | Remarks |
|---|----------------------|--------------|---------|
| Exploration of experimental data (descriptive statistics—arithmetic mean, median, quartiles, deciles, percentiles, mode, variance, standard deviation, standard error of the mean, coefficient of variation, relative errors, asymmetry index, excess index, graphical visualization of data, exploration of the relationship between variables—covariance, correlations) | Interactive teaching | 1            |         |
| Theoretical distributions (normal, Poisson, Bernoulli, Fisher, Student) + Statistical hypothesis testing (Student's t-test, Wilcoxon test, Mann-Whitney U test, Fisher's test, Chi-square test, Shapiro-Wilk test, Kolmogorov-Smirnov test)   | Interactive teaching | 1            |         |
| One-way/two way analysis of variance - ANOVA (variance conditions, pair comparison and multiple testing, Kruskal-Wallis test, Friedman test), covariance analysis - ANCOVA  | Interactive teaching | 1.5          |         |
| Regression analysis (simple, multiple, and factorial regression).   | Interactive teaching | 1.5          |         |
| Multivariate analysis (principal component analysis, cluster analysis, factor analysis)   | Interactive teaching | 1            |         |
| Bibliography<br>Quinn, G.P., Keough, M.J. 2002. Experimental Design and Data Analysis for biologists. Cambridge University Press  |                      |              |         |

| Verzani, J. 2005. Using R for Introductory Statistics. Taylor & Francis<br>Crawley, M.J. 2013. The R Book. John Wiley & Sons, Ltd.   |                                   |              |         |
|--|-----------------------------------|--------------|---------|
| 8.2 Seminar/ laboratory/ project   | Teaching-learning methods         | No. of hours | Remarks |
| Exploration of experimental data (descriptive statistics– arithmetic mean, median, quartiles, deciles, percentiles, mode, variance, standard deviation, standard error of the mean, coefficient of variation, relative errors, asymmetry index, excess index, graphical visualization of data, exploration of the relationship between variables–covariance, correlations) | Practical application on computer | 1            |         |
| Theoretical distributions (normal, Poisson, Bernoulli, Fisher, Student) + Statistical hypothesis testing (Student's t-test, Wilcoxon test, Mann-Whitney U test, Fisher's test, Chi-square test, Shapiro-Wilk test, Kolmogorov-Smirnov test)  | Practical application on computer | 1            |         |
| One-way/two way analysis of variance – ANOVA (variance conditions, pair comparison and multiple testing, Kruskal-Wallis test, Friedman test), covariance analysis – ANCOVA   | Practical application on computer | 1.5          |         |
| Regression analysis (simple, multiple, and factorial regression).  | Practical application on computer | 1.5          |         |
| Multivariate analysis (principal component analysis, cluster analysis, factor analysis)  | Practical application on computer | 1            |         |
| Bibliography<br>Quinn, G.P., Keough, M.J. 2002. Experimental Design and Data Analysis for biologists. Cambridge University Press<br>Verzani, J. 2005. Using R for Introductory Statistics. Taylor & Francis<br>Crawley, M.J. 2013. The R Book. John Wiley & Sons, Ltd.   |                                   |              |         |

#### 9. Correlation of course content with the demands of the labour market (epistemic communities, professional associations, potential employers)

The content of the discipline meets the expectations of organizations in various fields of activity, with graduates of the course being able to apply statistical analyses and formulate scientific conclusions based on the experimental data collected and the results obtained. The skills acquired are an essential prerequisite for the development of complex research projects. Doctoral students will be able to undertake complex research projects and interpret the information resulting from such research.

#### 10. Evaluation

| Activity type | 10.1 Evaluation criteria                             | 10.2 Evaluation methods  | 10.3 Percentage of the final grade |
|---------------|--|--------------------------|------------------------------------|
| 10.4 Lecture  | Solving specific situations related to data analysis | Applications on computer | 90%                                |

|   |            |                      |     |
|---|------------|----------------------|-----|
| 10.5 Seminar  | attendance | Active participation | 10% |
| 10.6 Minimal performance standard   |            |                      |     |
| <ul style="list-style-type: none"> <li>Correct analysis of data resulting from research specific to each field of engineering, as well as correct interpretation of the results obtained</li> </ul> |            |                      |     |

This Course Outline was approved by the Council of the Interdisciplinary Doctoral School (SDI) on 18 November 2025 and approved by the Council for Doctoral Studies (CSUD) on 19 November 2025.
