8 months

Project Manager - Renault Technologie Roumanie

Bucharest | Engineering | Auto / Automotive

- Establishing the simulation and physical validation plan to integrate technical definition diversity and test typology (homologation requirements, NCAP ratings, insurance type tests - RCAR, internal requirements)
- Analyzing the simulation results, identifying the problems and finding the best solutions together with the simulation team and other departments
- Planning the physical tests together with the crash laboratory teams from both Romania and France
- Coordinating the team of passive safety analysts to monitor the physical tests and providing them with the necessary information to create the test requests
- Analyzing the results, identifying the root cause of the non-conformities, presenting the conclusions to upper management and project team
- Organizing work sessions with other departments in order to find the best solutions for the problems and optimising them to take into account costs and physical mass reductions

Support for the process engineer. Measuring and evaluating parts according to work instruction. Monitor the parameters used and offer feedback to my superior regarding key process characteristics of the parts. Elaborate working instructions, control plan and production approval. Keep direct contact with quality department, logistics and production to ensure proper production for project parts. Producing templates for parts for a better quality evaluation in production. Analyse disturbances in the process, causes and improving the process.

Acquired skills and competencies:

microsoft word, SPC, microsoft powerpoint, reaction of PUR when applied on carbon

Nov 2013 - Feb 2014 Quality Consultant - Piese Subansamble Aero

4 months Brasov | Engineering | Naval / Aeronautical

My main responsibilities were to keep under control the documentation of the company, the quality manual, the procedures and work instructions more precisely. Also I was responsible with the documentation of the First Article Inspection of the products, keeping them in archives and keeping in touch with the client abroad.

Also other duties were to help organise the company and its documentation for their upcoming certification.

There I had the chance to work with a consultant in audit and taught me how to apply and implement 5S and 8D.

Jun 2012 - Oct 2012 manager assistant/trainee - Stabilus

5 months Brasov | Administrative / Logistics | Administrative / Public Sector

Being in an internship program my responsibilities were to schedule meeting for the manager, due daily weekly and monthly production reports/tables using the SAP Program . I was also in charge of the Passive Control file and had the opportunity to work also with the Quality department and Logistics Department.
